

Smart Turner Vertical Sump

Product Information

Vertical Sump Pumps Smart Turner Heavy Duty Sump Pumps are designed and built to give efficient, dependable service with minimum maintenance on a wide variety of wet pit applications. Standard columns to 12 ft., and longer when required, are assembled from 3, 2 and 1 ft. long cast column pipes with integral flanges and spigot fits to ensure rigidity and alignment. Cast in one piece, the open impeller is trimmed to the exact diameter required for the service, and factory balanced to ensure smooth, vibration free operation. The heavy section of the impeller provides excellent wear and corrosion allowance.
