

## Electro Mechanical

### ELECTRO MECHANICAL

EC&M has the capability to redesign and rewind electric motors both AC & DC. Ranging from fractional, up to and including 500 horsepower.

We provide a fully serviced repair shop including a temperature controlled stator burn out oven, automated coil winding machines, large stator varnish holding tank, and a 216 cubic foot bake oven.

In addition to the rewind division we have a full mechanical services division. We can overhaul motors from fractional up to and including 1000 horsepower.

We have a full machine shop facility and in house dynamic balancing capabilities.

EC&M also services most makes and models of MG Sets, mechanically and diesel driven generators.
